

GENUINE, PREMIUM GRADE WESTERN RED CEDAR

WESTERN RED CEDAR **SHINGLES, BEVEL SIDING & TRIM**

A unique combination of style, warmth & durability...

No other siding product adds more value to a home than wood. With Elite Western Red Cedar shingles, bevel siding, and trim from Coastal, you can have comfort knowing that you have installed the very best exterior siding on your project.

Aesthetic Quality

Western Red Cedar is well known for its warmth, character, exceptional beauty, and legendary performance as an exterior siding or trim product. It is an extremely versatile wood specie that accepts and holds a wide range of beautiful finishes exceptionally well, including Weathering Stains, Tinted Solutions, Semi-Transparent stains and traditional solid colors, which offer the best protection.

Sustainable

As one of nature's most sustainable materials, Elite Western Red Cedar siding and trim is made from a naturally renewable resource and cut from responsibly managed forests, ensuring that this durable material remains available to use for generations to come. Once it is cut, western red cedar is transformed from raw timber into beautiful building products that are used on residential and commercial construction projects across North America. This production process requires less energy, and also creates less air and water pollution, compared to the production of other more processed building materials like polymer based, wood composites or fiber cement products. Should you ever need to replace western red cedar, the old wood is completely biodegradable unlike other non-wood siding and trim materials.

Functional

While western red cedar is known for its beauty and performance, its functionality is equally impressive. WRC building materials are not bound by the latest fashion trends and blend well with multiple architectural designs. The natural appearance of western red cedar continues to look good and perform for many years, so you'll be less likely to remodel or replace it.

Traditional aesthetic appeal

When properly finished and maintained, Western Red Cedar is an ideal choice for exterior siding. WRC combines its traditional warm, aesthetic appeal with natural resistance to decay and attack from insects.

Elite Solid Bevel Siding

Elite Solid Bevel siding is a consistent and superior quality of Western Red Cedar and is available in three grades:

- Clear VG (graded for the smooth face)
- AYE (graded for the smooth face)
- AYE TEX (graded for the rough face)

Elite Clear Finger Joint Bevel Siding

Elite Clear Finger Joint Bevel Siding is also available in four grades:

- Clear VG (graded for the smooth face)
- Clear VG TEX (graded for the resawn face)
- AYE (graded for the smooth face)
- AYE TEX (graded for the rough face)

◆ Refer to pages 17-18 for additional product specifications ◆

Versatile and durable...

WRC siding from Elite can be used in wide range of architectural design projects ranging from traditional to contemporary styles. Proper finishing and installation adds to its natural longevity.

Pre-Sanded Face

Elite enhances the finish of its bevel siding by face sanding each board to further enhance its appearance and coating adhesion.

Unfinished

Finished – Lava Grey

Moisture Management

To improve the lifespan of Elite Western Red Cedar siding and trim, it is recommended that a rainscreen layer or drainable house wrap (like Slicker® Classic from Benjamin Obdyke shown below) be applied to exterior walls prior to installation of the siding to facilitate drainage and drying of any moisture on the backside of the siding.

WESTERN RED CEDAR BEVEL SIDING **PRE-FINISHING**

Add a standard or custom finish-to-order color with a 15-year warranty

Silver Dollar	Mist Gray	Sandstone
Rock Cliffs	Sage	Plunge Pool
Deep Charcoal	Harbor Grey	Country Red
Phoenix Fossil	Lava Gray	Khaki
Chalky Blue	Walnut	White

Pre-finished Color Options

Elite Western Red Cedar is available in a wide variety of standard and custom color options. Elite has you covered with a great assortment of the most popular, on-trend exterior siding colors. All backed by 15 year limited finish warranty.

Extraordinary Selection of 15 Standard Solid Colors

Fifteen standard solid colors are available with primer plus one coat or primer plus two coats. These colors are finished upon order. All standard and custom color orders are coated with PPG machine applied coatings. Please select a standard color or provide the color that you you are trying to match. Samples may be requested for your review prior to final approval and written sign-off.

Note: Custom stain pre-finishing (Weathering Stain, Maximum Cedartone, or Semi-Transparent Stain) is not available for this product.

Stock color is shown above. Due to printing limitations the exact color cannot be replicated. Please refer to actual color sample before ordering.

The best choice for exterior siding...

Elite stained WRC shingles combine the best exterior wood siding with superior coatings expertly applied by an industry leader.

#1 Grade

- No grades to choose from, just the very best grade produced for sidewall shingles
- Always Kiln-Dried to proper moisture content for superior coating adhesion
- 100% Clear, never any knots or defects, easier to work with
- 100% Heartwood provides a longer lasting shingle
- 100% Edgegrain ensures smoother, more consistent surfaces and superior coating adhesion versus shingles cut with flat grain
- 100% Edgegrain also creates better dimensional stability, therefore enhancing the performance of the coatings applied

Thicker and Wider Shingles

- .45" thick butts combined with 100% edgegrain provide a heavier shadow line and ensure shingles lay flatter on the wall
- When properly installed, the thicker shingles minimize the potential for cupping, curling and lifting
- Shingles vary in width from 3" to 14" providing wider average widths and less total fasteners used on the project

More Exposure Options

- Better exterior design flexibility with 18" length, thicker butt shingles allows for up to a maximum of 7" exposures on the wall

Superior Coating Technology

- Coatings offered from PPG, the originator and industry leader in machine applied coating technology

Expertly Coated Under Ideal Conditions

- Coated by SBC Cedar, an industry leader in machine coating application for over 20 years
- Proprietary dipping process is executed in a factory controlled environment under ideal conditions of temperature and humidity to ensure the perfect finish every time

WESTERN RED CEDAR **SHINGLES**

**Weathering Stain Aging Accelerant
Tinted Clear Solutions & Semi Transparent Stain**

**Accelerate the natural weathering process or...
Let the natural beauty of western red cedar shine...**

Weathering Stain Aging Accelerant (In-Stock)

For the oceanfront look of beautiful silver-gray shingles, Weathering Stain is the right choice. This PPG machine applied coating includes aging accelerants to enhance the natural process of Western Red Cedar turning a beautiful silver-gray tone. For best and fastest results, Weathering Stain shingles should be specified for homes that receive a large amount of sunlight and a limited amount of shade.

- Weathering Stain shingles are on the ground at Coastal and ready for prompt shipment.
- No finish warranty on Weathering Stain which is an aging accelerant only

Maximum Cedartone Tinted Clear Solution (In-Stock)

Let the natural beauty, warmth and character of Clear Western Red Cedar show through with Maximum Cedartone. This PPG machine applied coating is a tinted clear solution that provides protection against the elements. Maximum Cedartone shingles are on the ground at Coastal and ready for prompt shipment.

- No finish warranty on Maximum Cedartone Tinted Clear

Stock color is shown above. Due to printing limitations the exact color cannot be replicated. Please refer to actual color sample before ordering.

Semi Transparent Stains (Custom Order)

Want a different shade and natural woodgrain to show through? A complete line up of PPG semi transparent stains is available as a custom order. Please contact your dealer for complete details.
